## THE COMPANY

Founded in 1987, Álvaro Aguiar is headquartered in Americana-SP, where the central office, corporate departments, warehouse and manufacturing area are located.

Its technical and managerial competence is acknowledged to serve with quality, customers from all over Brazil, in projects of all sizes, benefiting from technology

to optimize services in order to ensure the absolute success of each project.

With its own manufacturing area, equipped with state-of-art equipment and tools, Álvaro Aguiar's logistics offers customers, from the most diverse industrial segments, a distinguished service in the execution of their projects.

Álvaro Aguiar has started its activities in the field of Industrial Civil Construction. Due to its working philosophy combined with the dynamics of the engineering market in Brazil plus its constant commitment to the improvement of its services, the company has developed professional training to enable its performance also in the areas of Mechanical and Electrical Assembly as well as Industrial Instrumentation. This has added value to the brand and has allowed customer projects to be carried out becoming a great competitive advantage.

Committed towards its goals achievement, Álvaro Aguiar ensures the execution of all projects in full compliance with planning, through a rigorous monitoring.

Constantly developing its technical and human skills, the company is structured to attend organizations that comply with the main international certifications.

Its client portfolio includes expressive brands of the petrochemical industry, beverages, food, paper and pulp, gas, energy and other developing sectors in the country.

### INDUSTRIAL CIVIL CONSTRUCTION

- Performs building construction works for industrial sites as well as the infrastructure necessary for the electromechanical installations of plants of a broad range of industries.

## INDUSTRIAL MECHANICAL ASSEMBLY

The company offers two types of services in this area:

- Metal structure manufacturing (spools, skids, vessels, among others) - for own projects or other companies;
- Final assembly of industrial plants at customers' sites.

## ELECTRICAL ASSEMBLY AND INDUSTRIAL INSTRUMENTATION

- Álvaro Aguiar has a highly skilled team of experts to perform electrical assemblies as well as instrumentation of all projects accurately, precisely and efficiently.
